

Hello, I'm Céleste

I'm a 19-year-old second-year student at EPITA, a French engineering school specializing in computer science. I love learning how things work, solving problems, and turning ideas into projects.

A LITTLE ABOUT ME

Learning, building, and staying curious.

I'm a second-year computer engineering student at EPITA, curious about how things work and how ideas become real projects. Technology, sports, and teamwork keep me learning, building, and looking for new challenges.

Schools

La Source Middle & High School, Meudon (2019–2025)

- French Baccalauréat with Honors
- National Brevet Diploma with High Honors
- Specializations: Mathematics, Physics-Chemistry, Computer Science
- Advanced Mathematics option

EPITA (2025–Present)

- Computer Engineering Program (English Track)

Standard Athletic Club

- Part-time position · July 2026–Present
- Building responsibility and interpersonal skills alongside my studies

WORK AND INTERNSHIPS

Experience.

PART-TIME POSITION · JULY 2026–PRESENT

Standard Athletic Club ↗

A part-time position alongside engineering studies, with a focus on developing professional responsibility and interpersonal skills.

VOLUNTEER COACH · SEPTEMBER 2024–PRESENT

ASPALA Antony Escalade ↗

Since September 2024, weekly sessions for 20 adult beginners have covered essential safety procedures and climbing fundamentals, with guidance adapted to each participant.

OBSERVATION INTERNSHIP · JULY 2022 · 1 MONTH

LISN ↗

Laboratoire Interdisciplinaire des Sciences du Numérique

During a placement with a combinatorics researcher at Université Paris-Saclay and CNRS, Python programming and discussions with doctoral students offered an introduction to mathematical research and scientific rigor.

OBSERVATION INTERNSHIP · JULY 2022 · 1 MONTH

Le Monde ↗

The placement included shadowing a journalist and attending an interview, providing first-hand insight into reporting and current affairs.

OBSERVATION INTERNSHIP · JULY 2021 · 1 MONTH

Arkose ↗

Responsibilities at the Massy climbing gym included café service, climbing-product sales, and contributing to new bouldering routes—building versatility and creativity.

OBSERVATION INTERNSHIP · APRIL 2021 · 1 MONTH

Le Jules Verne ↗

A pastry internship introducing the precision, discipline, and high standards of a Michelin-starred kitchen.

COMMUNITY & INITIATIVE

Taking action together.

Agenda 21 · Reducing food waste

The middle-school Agenda 21 workshop developed a chicken coop to repurpose cafeteria leftovers. Featured in Image Doc (issue 371), the project continues to benefit the school, where the chickens still live.

UNESCO workshop · Solidarity projects

The high-school UNESCO workshop has organized fundraisers for Imagine for Margo and Edenia, awareness activities about disposable e-cigarettes, and preparations for a Run Against Hunger.

SELECTED PROJECT

Things I've worked on.

FIRST-YEAR TEAM PROJECT · PYTHON · GAME DEVELOPMENT

Queen Amann

As part of my first-year project, I collaborated with four other students to design and develop Queen Amann, a 2D platform game created from concept to completion. Set in a pastry-themed world, the game follows an adventure to gather ingredients and save Queen Amann.

We worked across the full game development process, including game design, programming, asset integration, testing, and team coordination. Building a complete playable game gave me hands-on experience and strengthened my skills in:

- Teamwork and collaborative development
- Project planning and organization
- Game design and implementation
- Problem-solving and iterative development
- Communication within a team

Visit the Queen Amann project website ↗

WHAT I BRING

Skills and strengths.

Technical skills

Python · C · Git · Linux · macOS

Languages — French (native) · English (C1, TOEFL)

Driving licence — Category B

Soft skills

- **Curiosity** — always eager to discover new ideas and technologies.
- **Perseverance** — competitive climbing taught me to learn from challenges.
- **Teamwork** — I enjoy collaborating and contributing to shared projects.
- **Initiative** — I like taking responsibility and turning ideas into action.
- **Communication** — coaching beginner climbers taught me to adapt how I explain things.

OUTSIDE INTERESTS

Interests.

Competitive climbing

Six years of climbing and six hours of weekly training have led to departmental and regional titles in bouldering and lead, regional-team selection, French youth-team trials, and a top-25 finish at the French Championships. The sport continues to develop persistence and resilience.

Technology, mathematics, and travel

I'm drawn to programming, mathematical problem-solving, and challenging projects. Experiences in California and Germany have also sparked my interest in other cultures and international environments.

INTERNATIONAL EXPERIENCE

A student exchange in California.

EXCHANGE STUDENT · FEBRUARY–MARCH 2022

Silicon Valley International School

A month-long exchange in Palo Alto, living with a German-American host family and attending Silicon Valley International School, strengthened English skills and intercultural understanding. Visits to Google's offices and Stanford offered a glimpse into Silicon Valley's innovative and academic culture. The experience led to a return visit the following year and several trips to Germany to reconnect with friends.

LOOKING AHEAD

My career goals.

I want to become an engineer who develops innovative, meaningful technology. At EPITA, I'm working to strengthen my programming skills, deepen my understanding of computer science, and gain practical experience through challenging projects.

I'm eager to explore different fields, learn from experienced professionals, and discover where I can make the greatest impact. In the long term, I hope to contribute to meaningful projects in a stimulating, collaborative, and international environment.

Thanks for stopping by.
